SUPPLEMENTARY INFORMATION:

I. Abstract

The Chemical Weapons Convention ((CWC or Convention) is a multilateral arms control and non-proliferation treaty that seeks to achieve an international ban on chemical weapons (CW). The CWC prohibits, inter alia, the use, development, production, acquisition, stockpiling, retention, and direct or indirect transfer of chemical weapons. Furthermore, each State Party to the Convention is required to make initial and annual declarations on certain facilities which produce, process, consume, transfer, or import/export toxic chemicals and their precursors as specified in three lists or schedules of chemicals contained in the Convention's Annex on Chemicals. In addition to traditional CW agents, the Schedules include chemicals that have both large-scale commercial uses and CW applications (referred to as "dual-use chemicals"). Information is also required on facilities which produce a broad class of chemicals referred to as "Unscheduled Discrete Organic Chemicals," or "UDOCs." Finally, information is also required from facilities subject to inspection by the Organization for the Prohibition of Chemical Weapons (OPCW). This information is in addition to information provided in initial and annual declarations.
